

Soil Data Sheet

Record the numerical data from your soil test

Describe the location that you took soil from

What is the pH of your soil sample? _____

What is the Nitrogen (N) level of your soil sample? _____

What is the Phosphorus (P) level of your soil sample? _____

What is the Potash (K) level of your soil sample? _____

Extension: using the information sheet that came with the test kit, list some plants that would do well in your soil.

Extension: using the information sheet that came with the test kit, list some plants that would not do well in your soil.

(You can repeat the test up to 10 times with one test kit in different locations)
