Campus Field Work
Plants Around Your School

For this activity you will need a reference tool. The smartphone app “Picture This” (iphone) is an excellent resource, but there are many others. You can also use a tablet to take pictures of plants to be ID’ed back in the classroom with a desktop computer. You can also use the electronic version of this form and record everything online.

In small groups, students will walk around the school building taking pictures of plants that they find on campus. Keep a written record of your plants as you go. Use the form below to keep records
